

MICROMEMO™

compatible with  
iPod® nano 2G

Rev. 01/01/07

# HOLD THAT THOUGHT.

Turn your iPod® nano 2nd generation into a portable, pocket-sized recording studio. No tapes, no batteries, no cables. MicroMemo plugs into the dock connector to record interviews, meetings, lectures, or any audio content directly to your iPod nano. Capture audio using the flexible, detachable mic—or another type of microphone with a 3.5mm-plug, like our MemoMic lapel microphone. MicroMemo also records directly from a computer or soundboard via line-in capabilities.

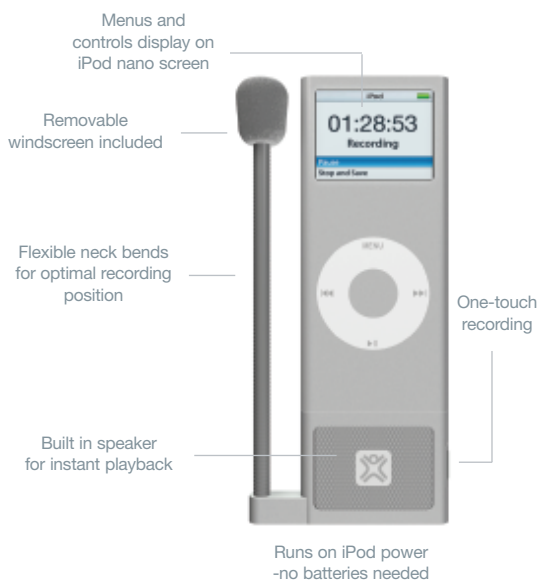

Recording time is displayed on your iPod nano screen in real-time, and the built-in speaker allows you to listen to your recordings instantly. Managing recordings is easy too: they are saved as files that import into iTunes at CD-quality.

MicroMemo's sleek, aluminum housing matches your iPod nano perfectly and houses the same technology that earned our original MicroMemo the 2006 Best Audio Recorder award from iLounge.

IPN-MIC-20	MicroMemo for iPod nano 2G	Silver	US
